Recording script

Format: run sheet. This is how many YouTubers plan a live-commentary video. Read the table from top to bottom. Each row is one part of the video: **what you do on screen**, **what you say**, and a **cue** (a small note). You don't read it word for word. Only the 🎯 lines are learned by heart. Everything else is natural talk.

Game facts (itch.io page, checked 28 Oct 2026): one woodcutter + small axe at the start · upgrades for axe, movement, carrying capacity, critical hits · bigger crews · lumbermills on a round planet · permanent prestige upgrades · felled counter goes up to the total (7,735 on Verdance) · demo = first 3 of 5 planets · Steam full game Tue 15 Dec 2026.

A. Before you press record (5 min)

□ Chrome open on the itch.io page. Game started. Pop-ups closed. Sound set.

□ OBS: mic preset on, game sound lower than voice. Test 10 s and listen back.

□ Read the **tree counter** once. Planet Verdance should show **7,735 trees** (seen 29 Oct). If different, fix the number in the title and thumbnail.

□ **Start OBS only now**, when you can see the planet and click. No menus in the video.

□ Marker hotkey ready (press it at every milestone = chapters later).

□ Water next to you. Say the 🎯 first sentence 3 times out loud.

B. Run sheet

1 · 0:00

ON SCREEN Already chopping. First click by **0:05**.

> SAY 🎯 **"This planet has 7,735 trees. I have one woodcutter and one small axe. I'm going to cut down every single tree."**

CUE Goal + number (planet Verdance, from the counter). No "hello".

2 · 0:10

ON SCREEN **Slowly spin the full planet once**, then move the mouse to the tree counter for 1 s.

> SAY 🎯 **"By the end of this video, this whole planet will be bald. Let's see how I get there."**

CUE Future tense (said live). In the edit you may swap in a past-tense line with the real result: "In one hour, I went from one woodcutter to [X] workers. This is how I got there." over a `/hook` mode B clip preview.

3 · 0:20

ON SCREEN Point at your woodcutter.

> SAY 🎯 **"This is Bob. Bob has a small axe and a big dream."**

CUE Running joke starts.

4 · 0:30

ON SCREEN Point at the counter, then the money.

> SAY **"At the top you see how many trees I cut, out of 7,735. Every tree gives money."**

CUE Max 2 sentences of explaining.

5 · 0:45

ON SCREEN Buy the first axe upgrade.

> SAY **"First upgrade: a sharper axe. Buying it." → "Okay, Bob is faster now."**

CUE Say the upgrade short. Never read the text.

6 · 1:00–2:00

ON SCREEN Hire workers, buy speed.

> SAY **"Let's hire more workers." / "Now I have [X] workers. Look at them go!"**

CUE Keep clicking. No silence.

7 · ~2:00

ON SCREEN Workers chopping.

SAY 🎯 **"If you like watching a planet go bald, subscribe. I finish a new game every few days."**

CUE One line only. Then back to the game.

8 · 2–10 min

ON SCREEN Early upgrades.

SAY **Milestone lines (C). Score line every few minutes.**

CUE Compare numbers: before → now.

9 · 10 min →

ON SCREEN Mills, crits, prestige, planets 2 and 3.

SAY **Milestone lines (C). React to every upgrade.**

CUE Long wait? Use a skip line (E).

10 · Middle

ON SCREEN Many workers.

> SAY **"Bob is a manager now. He has [X] workers."**

CUE Joke #2.

11 · Last tree

ON SCREEN The counter hits 7,735 of 7,735 (100%).

> SAY 🎯 **"The last tree… and it's gone. All 7,735 trees are cut!"**

CUE Press the marker. Pause 2 s.

12 · End

ON SCREEN Bald planet on screen.

> SAY **"Bob, we did it. There are no trees left. Bob is very tired." → Ending (F).**

CUE Joke #3. Keep the ending under 1 min.

C. Milestone lines (say them when they happen)

Axe upgrade

SAY **"Sharper axe. Before: [X] hits per tree. Now: [Y]."**

Movement upgrade

SAY **"Faster walking. Less walking, more chopping."**

Carrying capacity

SAY **"Now each worker carries [X] logs at once."**

More workers

SAY **"[X] workers now. The planet doesn't stand a chance."**

First lumbermill

> SAY **"A new lumbermill. The workers walk less, so the wood comes faster."**

Mill placement

> SAY **"There's a river here, so I put the mill on this side."**

Critical hits

> SAY **"Critical hits! Some trees fall in one hit now."**

Counter at half

> SAY 🎯 **"Half the planet is bald. [X] trees cut, [Y] to go."**

First prestige

> SAY **"Time to prestige. I lose this planet, but I keep permanent upgrades."**

New planet

SAY **"Planet [two / three]. It's much bigger. [X] trees."**

D. Score lines (every 3–5 minutes)

• "**[X]** trees cut out of 7,735. Next goal: **[Y]**."

• "I'm making **[X]** wood per second now."

• "Planet **[N]** out of 3."

E. Speed-up and thinking lines

Skip

SAY **"Let me skip ahead a bit." (speed up 4–8× in the edit, "x8" label)**

Skip

SAY **"The workers are doing everything now, so let's speed this up."**

Thinking

SAY **"Should I buy more workers, or a better axe? …I think the axe."**

Thinking

SAY **"My plan: first a new mill, then more workers."**

Slow part

SAY **"Okay, patience. We'll get there."**

F. Ending (last 1 minute)

1. **Verdict:** "So that's Deforest a Planet. The best part is watching the whole planet go bald. The weak part is **[your honest weak point]**."

2. **Who it's for:** "If you like games where you start tiny and end huge, this one is for you."

3. **Price:** "The demo is free on itch.io. The full game comes to Steam on December

15th. Links are in the description."

4. **Close:** "Which game should I play next? Tell me in the comments. Thanks for watching. See you in the next one."

G. Do not say (first 2 minutes)

"Hello, welcome…" · "Today I'm going to…" · "What is this? Maybe…" · reading upgrade or menu text aloud · settings screens.

H. Practice lines (say each 3 times before recording)

1. "This planet has **7,735** trees. I have one woodcutter and one small axe. I'm going to cut down every single tree."
2. "By the end of this video, this whole planet will be bald. Let's see how I get there."
3. "This is Bob. Bob has a small axe and a big dream."
4. "Half the planet is bald. **[X]** trees cut, **[Y]** to go."
5. "The last tree… and it's gone. All 7,735 trees are cut!"

I. Edit checklist (playbook/recording-and-editing.md)

• Cut every silence longer than ~3 s. Speed up long waits 4–8× with an "x8" label.

• First 2 minutes check: goal sentence first, chopping by 0:05, no menus, subscribe line near 2:00.
